

Appendices

(Available from the Authors)

Appendix 1	Reliability and validity: deprivation data gathered in 1952	Appendix 6
Table 1.1	Validity as expressed by factor loadings on principal component and correlation analysis	Table 6.1
Table 1.2	Correlations of criteria rated in 1952 and 1957	Table 7
Appendix 2	Inter-rater reliability: data gathered in 1979-1980	Table 8
Appendix 3	Family of formation: principal component analysis	Table 9a
Table 3.1	Correlation matrix: family of formation	Table 9b
Figure 3.1	Principal component analysis (eigen values)	Table 10
Figure 3.2	Principal component analysis	Table 11
Appendix 4	Addendum to housing neighbourhoods in Great Britain	Table 12
Table 4.1	Acorn classification of households 1980 categorized according to deprivation in family of origin (1952)	Table 13
Appendix 5	Some precursors of current unemployment	Table 14
Table 5.1	The precursors of unemployment in family of formation based on deprivation and unemployment in family of origin	Table 15
Table 5.2	Predicting unemployment in family of formation based on unemployment in family of origin and intelligence of the Red Spots at 11-plus examination	Table 16a
Table 5.3	Two factor prediction of male unemployment in Generation II	Table 16b
Table 5.4	Predicting the effects of unemployment and deprivation in Generation II	Table 16c
		Table 16d
		Table 17
		Table 18
		Table 19

Appendix 6	Two factors prediction of occupational class in the family of formation
Table 6.1	Two factor prediction of social class in Generation II
Table 7	Correlation of criteria of deprivation gathered prospectively (year 10) and retrospectively (year 30)
Table 8	Rates of unemployment according to degree of deprivation
Table 9a	Recommendation for job training
Table 9b	School attendance after 15th birthday
Table 10	Spouse self-report on school examinations
Table 11	Crighton/Mill Hill vocabulary scales: children of the Red Spots
Table 12	Reading performance of first-born children of family of formation
Table 13	Personal attributes of Red Spots in their final year at school
Table 14	Behaviour and illness in family of formation
Table 15	Housing of Red Spots in 1980 in relation to change in deprivation status 1952-1957
Table 16a	Criteria in 1980 shown by 35 families non-deprived in 1952
Table 16b	Families with three or more criteria of deprivation in 1952
Table 16c	Estimated degree of specific continuity from 1952-1980
Table 16d	Total declared income of families before deductions in 1980
Table 17	Correlation matrix of important explanatory variables
Table 18	Correlation of measures of behaviour in children in Generation III with explanatory variables
Table 19	Neighbourhood circumstances: ward rankings and offending by male Red Spots
