Part 1 A Study of Speech Retarded Children

1 Early development, types and prevalence

I. Kolvin, T. Fundudis and E. Scanlon

Introduction	3
Method	3
General	3
Speech retarded sample	4
Matched controls	4
Testing	5
Diagnosis and classification	5
Some background factors	8
Social class and speech retardation	8
Sex differences	8
Milestones and the specificity of speech retardation	10
Other milestones	11
Laterality	11
Perinatal factors	12
Birth order	13
Prevalence findings	13
Prevalence of speech retardation at the age of three	14
Disorders at follow-up: prevalence and comment	14
Concluding comments	20

2 Speech retardation: environmental and social factors

G. S. George and I. Kolvin

Introduction	23
--------------------	----

xiv Contents

Review of literature relating to effects of environmental variables on the acquisition of speech	23
Conclusions	30
Method	31
Findings	33
1 Perinatal and developmental factors	33
2 Evidence of developmental difficulties in the family	35
3 Social factors	36
4 Psychological tensions and stress in the home	39
5 Speech, language, literacy and social factors	43
Conclusions	48
3 A follow-up study: predictive importance—cognitive, language and educational development <i>T. Fundudis, R. F. Garside, H. I. J. van der Spuy, J. S. H. Nolan and I. Kolvin</i>	
Introduction	51
Aim	53
Method	53
Findings	54
Walking milestones—observed and expected findings for Residual Speech Retarded Group	54
Cognitive tests	55
Later speech and language functioning	57
Educational achievement	61
Imitation of gestures	61
Principal component analysis of cognitive data—cognitive style	62
Allowing for environmental influence	63
Discussion	64
Conclusions	66
4 Predictive importance—behaviour <i>I. Kolvin, T. Fundudis, G. S. George, R. M. Wrate and L. Scarth</i>	
Introduction	67
Method	68
Findings	68
Temperament	68
Dimensions of behaviour	69
Items or variables of behaviour	69
Behaviour questionnaire completed by teachers	71
Personality assessment	71
Clinical assessment by psychologist	71
Psychiatric, physical and neurological examination	71
Relationship between behaviour, intelligence and language development	73
Behaviour and general milestone delay and specific milestone delay	74
Relationship between verbal ability and behaviour	74
Discussion	76
Summary	77

5 The specific developmental speech disorder syndrome

T. Fundudis, I. Kolvin, R. F. Garside and E. Scanlon

Introduction	79
Definition of childhood dysphasia	79
Clinical features	80
Theoretical explanations	80
Validation of our classification of speech retardation	82
Hypothesis	82
Findings	82
1 Audiometric assessment of the Residual Speech Retarded	
Group and the controls	82
2 Global findings on cognitive testing	84
3 Cognitive tests—pattern of subtest scores	87
Intellectual functioning and 'dysphasia'	90
Rank order and gaps between WISC subtests	92
Rank order and gaps between ITPA subtests	94
Conclusion	95

6 Correlational and cluster analysis

I. Kolvin, R. F. Garside, T. Fundudis and P. Clarke

Aim	97
Method	97
Cluster analysis	98
Discussion of correlational analysis	99

7 Multivariate techniques and classification of speech delay

R. F. Garside, I. Kolvin, T. Fundudis, P. Clarke and G. S. George

Introduction	103
Aim of the present chapter	103
Method	104
Clinical approach to classification	104
Factor analytical approach	105
Principal component analyses	107
First principal component analysis—Residual Speech Retarded	
Group only	107
Second principal component analysis—Residual Speech Retarded	
Group only	108
Third principal component analysis—Residual Speech Retarded	
Group only	108
Final overall principal component analysis	110
Pictorial presentation of factorial data	110
Discussion of findings	112
Discriminant function analysis	112
Findings	113
A note on the ability to discriminate between the right and left side	
of the body	113
Conclusion	114

Part II A Study of Hearing-impaired Children

8 The hearing-impaired child of primary school age: background factors, maternal attitudes and maternal personality

H. I. J. van der Spuy, T. Fundudis, I. Kolvin and E. G. Tweddle

Introduction	117
Subjects and classification	118
Aim	119
Method	119
Results	120
1 Background factors and aetiology	120
2 Maternal attitudes and personality	127
Findings and discussion	128
Conclusions	129

9 Review of the literature: intellectual and language issues

T. Fundudis, I. Kolvin and R. F. Garside

Methodological issues	131
The relationship between language and intellectual processes in the deaf	132
The controversy: the independence or interdependence of language and thought	132
The intellectual processes of the deaf	132
The importance of the environment: deaf and hearing parents	133
Language development in deaf children	134
Cognitive development	137
Introduction	137
Verbal and non-verbal abilities	137
Specific disabilities	138
Interim discussion	141
Educational attainment	141
Factor analysis	142
Summary	143
Implications for our research	144

10 The hearing-impaired child: intellectual and educational development

T. Fundudis, H. I. J. van der Spuy, R. F. Garside and I. Kolvin

Introduction and aim	147
Method	147
Selection of cases	147
Tests used	148
Definition of deafness	148
Audiometric assessment of our hearing impaired group	148
Findings	149
Differences between the means of the groups on cognitive tests	149
Subtest profiles	153
Subtest scatter	156

Deafness and specific intellectual functions	157
Discussion	159
Correlation of handicaps and achievements	159
Rank order and gaps between non-verbal subtests	162
WISC	162
ITPA	162
Verbal abilities of partially hearing children	163
Introduction, aim and method	163
Findings	164
Discussion	164
Principal component analysis	165
Interim discussion	166
Educational attainment	167
Some final comments	168
Explanation of handicaps in terms of models of intelligence	168
Cerebral dysfunction	170
Conclusion	171
11 The hearing-impaired child: behaviour and personality	
<i>I. Kolvin, H. I. J. van der Spuy, T. Fundudis, E. G. Tweddle</i>	
<i>and G. S. George</i>	
Introduction and review of previous literature	175
Aim	177
Method	177
Findings	177
Rutter Teacher Scale	177
Behaviour Scale (Based on an interview with mother)	179
Temperament	182
Discussion and conclusions	182
Part III Summary and Appendices	
Summary	
<i>T. Fundudis, I. Kolvin, R. F. Garside</i>	
Background to the study	185
1 Speech retarded children	186
Aims and objectives of study	186
Method	186
Losses	187
Diagnosis and classification	187
The value of a simple speech screen at the age of three years	190
Prevalence—incidence of disorders	190
Influence of sociocultural factors	190
Predictive importance of speech delay	191
Multivariate analyses	193
Sex differences	194
2 Hearing-impaired children	194
Diagnosis and classification	194
Social and family background	195

xviii Contents

Non-verbal cognitive abilities	196
Subclassification of hearing-impaired group and profile of abilities ..	196
Behaviour and personality	197
Appendix 1 Supplementary tables	199
